## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1, 4-6, drawn to an aluminum electrolytic capacitor comprising an electrolytic solution containing a onium salt of fluorine-containing anion, having a water concentration of 1 % by weight or less.

Group II, claim(s) 2-3, drawn to an aluminum electrolytic capacitor comprising an onium salt of fluorine-containing anion; a cathode, wherein the cathode has a peak top of Al2p spectrum of 74.0 to 75/8eV.

Group III, claim(s) 7-12, drawn to a quaternary cyclic amidinium tetrafluoroaluminate represented by formula 1 and a solvent.

Group IV, claim(s) 13-23, drawn to a method for preparing an organic onium tetrafluoroaluminate which comprises reacting hydrogen fluoride and or fluorosilicic acid; and organic onium salt; and an aluminum compound.

The inventions listed as Groups I, II, III, IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I is drawn to an aluminum electrolytic capacitor comprising an electrolytic solution containing a onium salt of fluorine-containing anion, having a water concentration of 1 % by weight or less;

Art Unit: 2831

Group II is drawn to an aluminum electrolytic capacitor comprising an onium salt of fluorine-containing anion; a cathode, wherein the cathode has a peak top of Al2p spectrum of 74.0 to 75.8eV; Group III is drawn to a quaternary cyclic amidinium tetrafluoroaluminate represented by formula 1 and a solvent; and

Group IV is drawn to a method for preparing an organic onium tetrafluoroaluminate which comprises reacting hydrogen fluoride and or fluorosilicic acid; and organic onium salt; and an aluminum compound.

2. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
